## **Custom Solutions**

We work with all our customers to develop best-in-class solutions that address their unique business challenges. Our modular platform aggregates data from disparate systems to drive a unified understanding of your entire supply chain.

We've leveraged its extensible architecture to create over a hundred unique solutions that enhance our customers' operations.

Rivet is a business partnership management solution designed to help you manage people, projects and assets. We formalize informal processes to make complicated, multi-party tasks a breeze.

Passport is a supplier subscription service that improves the flow of information between suppliers and retailers. Passport's customizable dashboards, specialized performance panels, and advanced data visualizations empowers suppliers to identify trends, quickly react to change and avoid problems that lead to lost revenue.
